EDUCATION

Purdue University, College of Science

West Lafayette, IN

Bachelor of Science in Computer Science; Certificate in Entrepreneurship and Innovation

May 2028

- GPA: 3.58/4.0
- Relevant Coursework: Data Structures & Algorithms, Computer Architecture, Systems Programming, Human-Computer Interaction, Fundamentals of Computer Graphics, Introduction to Artificial Intelligence

EXPERIENCE

Software Engineering Intern

May 2026 – Aug 2026

SEP

Westfield, IN

- Shipped full-stack features for a web platform serving a Fortune 500 pharmaceutical client, moving shipments worth hundreds of millions through U.S. Foreign Trade Zones with U.S. Customs and Border Protection.
- Cut manual data entry in the customs form wizard by 25% by building a searchable React (TypeScript) dropdown backed by a new PostgreSQL table, with matching TypeORM entity and DTO changes.
- Refactored a monolithic filing service into a focused NestJS module with five shipment-specific endpoints.

Software Engineer

Jan 2026 – May 2026

Only Local Tickets

Remote

- Built a pricing platform surfacing live market data via an embeddable React (TypeScript) widget across every World Cup match page, giving fans pricing transparency during volatile demand, using Cursor to create tests and ship efficiently.
- Delivered hourly price tracking across World Cup games by building a data pipeline with Supabase that ingests Only Local Tickets' listings from the Ticket Evolution API and aggregates them into time-series data.
- Scaled event coverage to 2,000+ live events by deploying an internal admin tool for business users to add events.

Data Engineering Intern

May 2025 – Aug 2025

Corteva Agriscience (via Insight Global)

Indianapolis, IN

- Reduced monthly ticket-analytics reporting prep by 50% across global seed and biologicals operations by implementing a Power Automate workflow on the ServiceNow API.
- Automated detection of missing volume-planning inputs by integrating three SAP tables (100K+ records) into a relational database powering a live Power BI dashboard.

PROJECTS

Price Is Right | *Ray-Ban Meta Glasses, SwiftUI, Gemini Vision*

StarkHacks Purdue, Apr 2026

- Engineered a voice-activated secondhand item valuation assistant for Meta Ray-Ban glasses, using AI vision to identify items and surface fair pricing across eBay and other secondary markets in the user's ear.

Bible Verse Detection | *OpenCV, Google Cloud Vision API, Python*

May 2025 – Jul 2025

- Built an image processing pipeline to detect and extract underlined verses via Hough Line Transform and OCR, keeping meaningful passages front of mind between readings.

TREC Team Queue | *React (TypeScript), Tailwind CSS, Supabase*

Aug 2024 – Dec 2024

- Created a full-stack team rotation platform for Purdue's TREC indoor soccer with a dual-interface (iPad control + synced TV display) to reduce disputes and improve rotation efficiency.

LEADERSHIP

Purdue LaunchPad Co-President

Jan 2026 – Present

- Lead Purdue's largest CS/DS/AI mentorship program (110+ students), pairing first-semester freshmen with upperclassmen to ship their first technical project and build relationships that shape their next four years.

Greek InterVarsity Chapter Ministry Leader, Old Masters Host, Purdue Orientation Team Lead

SKILLS

Languages: JavaScript (TypeScript), HTML/CSS, C/C++, SQL (PostgreSQL), Python, Java

Frameworks & Libraries: React, Node.js, NestJS, TypeORM, Recharts, Three.js, OpenCV, OpenGL

Developer Tools: Git, GitHub, Firebase, Supabase, Cursor, Claude Code, GitHub Copilot, Jira, IntelliJ, VS Code
