EDUCATION

Purdue University, College of Science

West Lafayette, IN

Bachelor of Science in Computer Science; Certificate in Entrepreneurship and Innovation

May 2028

- GPA: 3.58/4.0
- Data Structures & Algorithms, Operating Systems, Computer Architecture, Systems Programming, Object-Oriented Programming, Human-Computer Interaction, Fundamentals of Computer Graphics

EXPERIENCE

Software Engineering Intern

May 2026 – Aug 2026

SEP

Westfield, IN

- Reduced manual customs-filing data entry by 30% for a Fortune 500 pharmaceutical client by redesigning the React form wizard's input flow with custom search dropdown components.
- Productionized mock server authentication by implementing NestJS backend API endpoints to unblock testing for two third-party supply chain integrations.

Software Engineer

Jan 2026 – May 2026

Only Local Tickets

Remote

- Built an hourly ETL pipeline (TypeScript, Supabase Edge Functions) for 2026 World Cup event pages: ingests ticket listings from the Ticket Evolution API for all 104 games, aggregates min/avg/max prices per game, and writes hourly time-series data to Supabase.
- Shipped an embeddable pricing widget that visualizes historical pricing from pipeline data and supports multiple instances per page.

Data Engineering Intern

May 2025 – Aug 2025

Corteva Agriscience (via Insight Global)

Indianapolis, IN

- Automated supply chain workflows using Python, Alteryx, and Power Automate to streamline reporting, reducing ticket refresh report steps by 50%. Presented and demonstrated the MVP to IT leadership (S&OP, Seeds, Biologicals) and business stakeholders.
- Designed and implemented a relational database integrating 3 SAP tables and 100K+ records to support Power BI dashboards, automating detection of missing flat file inputs in global volume planning.

PROJECTS

WuXDesign Portfolio | *Three.js, HTML/CSS/JS, Vite*

May 2026 – Aug 2026

- Built a personal portfolio site featuring an interactive 3D MacBook model with stickers mapped to navigation, using a lightweight vanilla JS/Vite stack to keep the experience fast and intuitive.

Price Is Right | *Ray-Ban Meta Glasses, SwiftUI, Gemini Vision*

StarkHacks Purdue, Apr 2026

- Engineered a voice-activated secondhand item valuation assistant for Meta Ray-Ban glasses, using AI vision to identify items and surface fair pricing across eBay and other secondary markets in the user's ear.

TREC Team Queue | *React (TypeScript), Tailwind CSS, Supabase*

Aug 2024 – Dec 2024

- Created a full-stack team rotation platform for Purdue's TREC indoor soccer with a dual-interface (iPad control + synced TV display) to reduce disputes and improve rotation efficiency.

LEADERSHIP

Purdue LaunchPad Co-President

- Directing Purdue's largest CS/DS/AI mentorship program (90+ students), leading a leadership team to connect freshmen with upperclassmen on semester-long technical projects; managed recruitment and redesigned incentives and events, increasing engagement by 30%.

Greek InterVarsity Chapter Ministry Leader, Old Masters Host, Purdue Orientation Team Lead

SKILLS

Languages: JavaScript (TypeScript), HTML/CSS, C/C++, Python, SQL (PostgreSQL), Java

Frameworks: React, Node.js, NestJS, Three.js, React Native

Developer Tools: Git, GitHub, Firebase, Supabase, Vercel, Cursor, Claude Code, Jira, IntelliJ, VS Code
